Career Objective

Motivated Computer Science undergraduate with a strong foundation in software development, machine learning, computer vision, and web technologies. Experienced in developing real-world projects using Python, OpenCV, MediaPipe, Scikit-learn, React.js, Node.js, Express.js, and MongoDB, with hands-on experience in machine learning and full-stack web development. Eager to apply technical and problem-solving skills, learn emerging technologies, and contribute to innovative solutions while building a successful career in the IT industry.

Education

B.Tech in CS(AI) , Maharana Pratap Engineering College CGPA - 7.33/10	2023 – 2027 Kanpur
Class XII , BSS Education Centre	2023 Kanpur
Class X , BSS Education Centre	2021 Kanpur

Skills

Programming Languages • Python • JavaScript • SQL (Basic)	Web Technologies • HTML • CSS • JavaScript	Tools & Platforms • MS Excel • Windows • Linux
Frameworks & Libraries • NumPy • React.js • Express.js	Core Competencies • Problem Solving • Basic DSA • Prompt Engineering	Backend Technologies • Node.js • REST APIs • JWT Authentication

Certificates

Advanced Software Engineering Job Simulation Walmart	Data Visualization Using Python IBM	Python (5-Star Rating) HackerRank

Projects

Task Management System(Full-Stack Web Application)

- Technologies:** React.js, Node.js, Express.js, MongoDB, JWT, Axios, HTML5, CSS3
- Developed a full-stack task management web application enabling users to securely manage their daily tasks through JWT-based authentication.
 - Implemented CRUD functionality to create, update, delete, and track task status with seamless communication between the React frontend and Express.js backend.
 - Designed RESTful APIs using Node.js and Express.js, with MongoDB used for persistent data storage.

- Built a responsive and user-friendly interface using React.js and Axios for efficient API integration and improved user experience.

Hand Gesture Recognition System

Technologies: Python, OpenCV, MediaPipe Hands, NumPy, Pandas, Scikit-learn, Joblib, Git, GitHub

- Developed a real-time hand gesture recognition system using OpenCV and MediaPipe, extracting 21 hand landmarks (63 features) from webcam input.
- Trained a Random Forest classifier on 2,400 samples across 8 gestures, achieving 98.96% test accuracy.
- Implemented real-time gesture prediction and display for Open Palm, Fist, Thumbs Up, Thumbs Down, Peace, Point, Three, and OK.
- Managed dataset processing, model persistence, and project version control using Pandas, Joblib, Git, and GitHub.

Interests

- Listening to educational and technology podcasts
- Keeping up with emerging technology trends
- Learning about AI and software development
- Playing Cricket

Activities

- Collaborated in a team-based academic software development project.
- Participated in a technical event, demonstrating knowledge of computer science fundamentals, logical reasoning, and problem-solving abilities in a competitive environment.
